DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an organic EL display and method thereof having, inter alia, each of said light emitting parts further including a source-drain insulating film for avoiding a short circuit between said source electrode and said drain electrode, a protective insulating film for protecting said organic semiconductor film, and a pixel insulating film for covering an edge of either one of said electrodes of said organic EL device; and at least two out of said source-drain insulating film, said protective insulating film, and said pixel insulating film being made of the same dielectric material (claims 1 and 7). The remaining claims 2-6 and 8 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamahara et al., Pub. No. 2004/0201018 ; Cok et al., Patent No. 6,812,637.

None of the above documents discloses the common insulating film as recited.

Art Unit: 2828
